4959. Hon Sally Talbot to the Minister for Mental Health representing the Minister for Environment

- (1) Is the Minister aware of Commonwealth Government advice that the western ringtail possum has disappeared from 90 percent of its original range due to a number of threats including habitat loss due to land clearing and logging, and introduced predators such as foxes and cats, with the most significant threat to the species currently being the ongoing clearing of habitat in the Busselton area for urban development?
- (2) Does the following information from the Department of Environment and Conservation (DEC) website about strategies for the recovery of the western ringtail possum represent the entirety of DEC's conservation efforts in relation to the western ringtail possum: '1. Conserving existing populations within public lands managed by the Department of Conservation and Land Management. 2. Improving the species conservation status, through habitat management (including fox control) and translocations to increase their numbers. 3. Minimising the impact of land developments through in-situ conservation and translocations. 4. Ensuring that derelict (injured, orphaned or nuisance) animals are rehabilitated where possible and released into the wild where chances of survival are maximised.'?
- (3) If no to (2), what other strategies are being employed by DEC to ensure the survival of this species?
- (4) If yes to (2), what evidence is there that DEC's strategies are effective? In particular, have previous well-documented failures to translocate successfully the species been overcome, so that translocation is a viable option for species recovery?
- (5) If translocation is a viable option for species recovery, how have the possible causes for the lack of translocation success (including drought, mesopredator release, prey switching, unsuitable habitat at release sites, anthropogenic disturbances, disease and competition with sympatric native species) been avoided?
- (6) Does the translocation of western ringtail possums ever involve 'hard release'?
- (7) Is radio collaring one of the devices used to monitor the translocated possums?
- (8) If yes to (7), what evidence about the success or failure of the translocation is provided by the use of radio collars?
