4809. Hon Kate Doust to the Minister for Energy

- (1) For what reason did Synergy not disclose to the Australian Taxation Office (ATO) in their application for a private tax ruling that rather than meter accuracy, the reason they use a total supply net calculation is due to a direction from the Office of Energy and the Western Australian Government?
- (2) Does the Minister concede that by calculating net total supply without taking into consideration bi-directional flow, Synergy is in breach of clause 9.5 of the Commonwealth's *A New Tax System (Goods And Services Tax) Act 1999*?
- (3) If no to (2), why not?
- (4) Does the Minister stand by Synergy's statement to the ATO that import/export meters are not accurate and require a mathematical calculation to improve accuracy?
- (5) If yes to (4), and these meters are not accurate, how does the swapping of one imported unit for one exported unit improve the accuracy?
- (6) Does the Minister concede that all domestic single phase solar systems whether connected to a single or three phase supply all work in exactly the same way and can only export on a net of consumed basis?
- (7) If no to (6), why not?

- (9) If yes to (8), why is this not being applied to electricity in the case of Western Australian homeowners with a renewable energy system?
